Prices valid from September 1<sup>st</sup> 2022

Pivaset Ltd., which was founded in 1990, merged with Gebwell Ltd. on 31 December 2016 and is now part of the Gebwell Group. Pivaset will continue to be used as an auxiliary business name for Gebwell Ltd., and fire extinguishing products will still be sold under the Pivaset name. Our professional design, production and sales personnel guarantee our customers secure, high-quality and fast services. The product development of fire hydrants began in 1993 and still continues.

#### **Quality from Finland**

Our fire hydrants are produced in Finland in accordance with standard EN 671-1:2012. Pivaset basic model fire hydrant cabinets and hose reels of up to 30 metres are CE-marked. Fire hydrant cabinets and hose reels are made of epoxy powder-coated steel sheeting that is 1.25 mm thick for the fire hydrant cabinets and 1 mm thick for the hose reels. The reels are always painted red. Cabinets come in three standard colours: white, grey and red. Other colours are available by special order.

All cabinets have a welded structural back wall and reinforced doors. The hinges are made of steel and are adjustable. The door is equipped with a special lock with a breakable lock protector. The doors open 180 degrees so as to allow a hose reel installed on the door to function freely. The reel hubs are special brass moulded and pressure tested.

Fire hydrant hoses are manufactured in accordance with standard EN 694. Fire hydrant hoses are lightweight, and they have a polyester weave reinforcement. The operating pressure of the lightweight hoses is 1.2 Mpa and their burst pressure is 9 Mpa (+20C). Alternatively, fire hydrant cabinets are available with a nitrile/PVC hose with an operating pressure of 1.2 Mpa and a burst pressure of 4 Mpa (+20C). The lightweight hose, as its name suggests, is light to handle, but it is not recommended for continuous use in the cleaning of wearing floor surfaces. The hose/ nozzle holder prevents the hose from getting caught between the door. All cabinet models are equipped with a spring-reinforced feed hose. Fire hydrant cabinets are equipped with a direct/fog nozzle and 1" shut-off valve.

A flush-mounting frame is available for fire hydrant cabinets to wholly or partially sink the cabinet into a wall.

Flexibility and great service are our trademark! Products can be customised with desired structures and dimensions.

Cabinets are normally equipped with a right-handed door (as in the images). Left-handed doors are available on request. The handedness of cabinets can also be changed afterwards. The standard cabinet colours are grey (RAL 7040), white (RAL 9016) and red (RAL 3020).  $\bigcirc \bigcirc \bigcirc$ For outdoor use, we recommend the cabinet equipped with a heater, page 9, or an industrial model / stainless steel cabinet, pages 9-10. The CE-marked (EN 671-1:2012) fire hydrant reel is always red, and the maximum length of the hose is 30 metres.

#### **PV-102 Fire hydrant cabinet**

#### Width 990 x height 690 x depth 290 mm

The cabinet has space for a fire extinguisher. The cabinet can be partially sunk to a desired depth using a separate flush-mounting frame available on page 26.

PV-202 and flush-mounting frame

The standard cabinet colours are grey (RAL 7040), white (RAL 9016) and red (RAL 3020).

PV-102 and flush-mounting frame

For outdoor use, we recommend the cabinet equipped with a heater, page 9, or an industrial model / stainless steel cabinet, pages 9-10. The CE-marked (EN 671-1:2012) fire hydrant reel is always red, and the maximum length of the hose is 30 metres.

#### **PV-142 Thin fire hydrant cabinet**

#### Width 790 x height 790 mm

The shallow model fits into confined spaces, such as corridors. The cabinet can be partially sunk to a desired depth using a separate flush-mounting frame available on page 26.

			VAT 0%

Price without hose and nozzle. Select hose assembly on page 24. Maximum 19 mm/45 m or 25 mm/30 m.

All cabinet models are equipped with a hose or nozzle holder to prevent the hose from getting caught between the door.

The door is equipped with a special lock with a breakable lock protector. (image on the right)

The standard cabinet colours are grey (RAL 7040), white (RAL 9016) and red (RAL 3020).  $\bigcirc \bigcirc \bigcirc$ For outdoor use, we recommend the cabinet equipped with a heater, page 9, or an industrial model / stainless steel cabinet, pages 9-10.

The CE-marked (EN 671-1:2012) fire hydrant reel is always red, and the maximum length of the hose is 30 metres.

8

### Heat-insulated fire hydrant cabinets with a heater

Heat insulation 19 mm cellular rubber

Double insulated door. The thermostatically controlled electrical resistor 200 W (230 V) keeps the inside temperature of the cabinet at +5 degrees Celsius. If the cabinet is installed in windless location, its frost resistance is -35 degrees Celsius. The cabinet is thus suitable for cold stores as well as other unheated spaces and warehouses. Other materials and dimensions correspond with the basic model.

### Industrial model fire hydrant cabinets

The spacious industrial model cabinets are suited for continuous heavy use. Sturdy doors come with durable stainless steel locks. These models include an industrial model hose reel with a folding rewinding crank and a brass curve rising from the reel hub to the casing. PV-112 has additional space for a fire extinguisher. Vertical cabinets with space for a fire extinguisher are also available by special order. We offer separate industrial models with pressure rating PN 1.6 MPa.

**The PV-40** fire hose cabinet is equipped with a hose, valve, hinged rack and nozzle with connectors.

The standard cabinet colours are grey (RAL 7040), white (RAL 9016) and red (RAL 3020).

### Outdoor fire hydrants

#### **PV Outdoor fire hydrant**

With the PV Outdoor fire hydrant, a water pipe and a valve unit can be led through to an exterior wall. The PV Outdoor fire hydrant can be covered with e.g. PV Standard cabinet 5/12 (page 19) or PV-40 Fire hose cabinet (above).

Pr.Code	Model/size mm	<b>Price EUR</b>
2951098	PV Outdoor fire hydrant 1"	435.60
2951097	PV Outdoor fire hydrant 2"	665.50
2951099	PV Outdoor fire hydrant 3"	1182.50
		VAT 0%

PV Outdoor fire hydrant contains a shut-off valve (red metal), piping (painted), quick connect fitting nipple (light metal) and extension unit. When ordering, please indicate the distance of the exterior wall from the centre of the pipe (drawing on the right) or the thickness of the wall.

Indicate the distance of the exterior wall (measurement x) from the centre of the pipe or the thickness of the wall when ordering an outdoor fire hydrant.

### **Dry riser cabinets**

Dry riser cabinets are installed in connection with fixed dry risers. The Inlet cabinet is installed on the ground floor. Fire fighters connect their fire engine hose to the Inlet cabinet connected to the dry risers. A dry riser cabinet with couplings for hoses and dry risers is installed on each floor.

#### **PV-SK Dry riser inlet cabinet**

Width 650 mm x height 650 mm x depth 500 mm Inlet cabinets are made of 1.25 mm steel sheeting. All cabinets have a welded structural back wall. The doors turn down 180 degrees. Inlet cabinets are equipped with 2x DN 80 fittings and a DN80 Victaulic fitting for the dry riser. Inlet cabinets are also available equipped with one valve and the fittings to the dry riser are available also from above or behind the cabinet. Cabinets are red as standard, but are also available in other colours

### Hose reels for fire fighting, cleaning and watering...

The reels are made of 1 mm, epoxy powder-coated steel sheeting. The reel hubs are special brass moulded and pressure tested. Fire hydrant hoses are lightweight, and they have a polyester weave reinforcement. The operating pressure is 1.2 Mpa and burst pressure is 9 Mpa ( $+20^{\circ}$ C). In standard models, the hose is reinforced with a support spring. The CE-marked (EN 671-1:2012) fire hydrant reel is always red, and the maximum length of the hose is 30 metres.

#### **PV-23 Fire hydrant reel** with wall-mounting plate

#### Diameter 550 x depth 230 mm

Hose reel designed for fire hydrants. For other usage, we recommend the industrial model. Includes fire hydrant hose and direct/ fog nozzle. Equipped with a wall mounting bracket, hose guide, 1" shut-off valve, connecting hose, and rewinding knob.

# Nozzle cabinets

### **Pillar fire hydrant**

Pillar fire hydrants are designed for spaces where the walls are reserved for other use, such as for shops and industrial halls. The pillar fire hydrant is mounted on a pillar or a wall at operating height. The hose reel is mounted, for example, above the shelf level.

Due to its light weight, the pillar fire hydrant can also be mounted on light partition walls. The nozzle cabinet (SV) can be flush-mounted in wall structures. If flush-mounting is used, the hose travels inside the wall up to the hose reel. The fire hydrant reel is placed up in the ceiling structures or into a storage space or other suitable space behind a wall.

#### Nozzle cabinet / Pillar fire hydrant

The door of the pillar fire hydrant is equipped with a special lock with a breakable lock protector. The cabinet (SV) with manual valve includes 2 hose guides, U-piping (Cu 28) and 1" shut-off valve. The empty cabinet (IV) only contains 1 hose guide. **All pillar fire hydrants can be paired with a hose reel.** 

Cabinets with a shut-off valve can be paired with fire hydrant reel PV-23 or PV-60. Nozzle cabinet delivered without equipment can be paired with, for example, fire hydrant reel with automatic valve PV-23A. Model PV-57 has space for a fire extinguisher. Select fire extinguisher on page 23.

#### **PV-5 Fire extinguisher cabinets**

Fire extinguisher cabinets are made of 1.25 mm steel sheeting. The basic models are epoxy powder-coated in red, white or grey. The door is equipped with a special lock with a breakable lock protector. The stainless steel model has a metal lock.

Fire extinguisher cabinets come in three sizes: for 6 kg and 12 kg powder fire extinguishers and for carbon dioxide fire extinguishers. Alternatively, there is a model with an inspection window. Fire extinguisher cabinets can also be installed outdoors to protect the extinguisher from the weather. If necessary, a flush-mounting frame is available for the cabinet on page 26.

# Other extinguishing products

### **Fire extinguishers**

The extinguishers are tested and approved in accordance with the EN3 standard. The fire extinguishers are equipped with a wall mounting bracket and a positioning label as standard. With the exception of PV-EURO P2, which is equipped with a vehicle rack.

#### **Powder fire extinguishers**

Powder fire extinguishers are suitable for extinguishing most fire types. For example wood, paper, textile, petrol, oil and varnishes. It is also suitable for extinguishing devices with live voltage. The powder in powder fire extinguishers interrupts the burning process and forms a protective layer on glowing materials to prevent re-ignition. The

**VAT 0%** 

extinguishing powder does not conduct electricity, and it is frost resistant. The storage and operating temperature for powder fire extinguishers is -30 C to + 60 C.

Pr.Code	Model, capacity	Class	<b>Price EUR</b>

2961112	PV-EURO P12, 12kg	55A 233B C	185.76

### **Carbon dioxide (CO2) fire extinguishers**

CO2 fire extinguishers are suitable for extinguishing burning liquids, such as petrol, oil or grease. It is also ideal for extinguishing electrical appliance fires. Carbon dioxide extinguishes the fire by smothering it. The carbon dioxide snow generated by the nozzle and snow spout of the extinguisher enhances the extinguishing effect. CO2 does not conduct electricity, and it is frost resistant. The storage and operating temperature for the fire extinguishers is -30 C to + 60 C.

#### Liquid fire extinguishers

A foam extinguisher effectively and cleanly extinguishes class A fires, or fibre materials such as wood, paper and textile. It can also be used to extinguish class B fires, such as petrol or oil fires, and it can be used for electrical appliance fires as long as the safety distance of 1000 V/ metre is regarded. Aqueous film forming foam extinguishers are easy to use due to their long operating time and good visibility. The foam

does not make a mess, so it will not cause a lot of damage. The foam effectively prevents re-ignition.

#### **Fire hydrant hose**

The lightweight hose is a polyester/EPDM hose with a weave surface and weave reinforcements. The burst pressure of the hose is 9 MPa. The weight of the lightweight hose is approx. 30% of the weight of a corresponding nitrile/PVC hose. Lightweight hoses are not recommended as cleaning hoses for wearing floor surfaces.

The burst pressure of a nitrile/PVC hose is 4 Mpa.

The hoses are manufactured in accordance with standard EN 694.
